INFORMATION

"Information is that which allows you to make a correct prediction with accuracy better than chance."

Adami, Christoph. "What Is Information?" Philosophical Transactions of the Royal Society A: Mathematical, Physical and Engineering Sciences, vol. 374, no. 2063, Mar. 2016, p. 20150230, https://doi.org/10.1098/rsta.2015.0230.

"Information is that which allows you to make a correct <u>prediction</u> with accuracy better than <u>chance</u>."

Adami, Christoph. "What Is Information?" Philosophical Transactions of the Royal Society A: Mathematical, Physical and Engineering Sciences, vol. 374, no. 2063, Mar. 2016, p. 20150230, https://doi.org/10.1098/rsta.2015.0230.

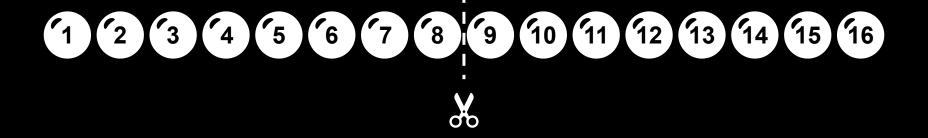

defining and measuring information

guess the number am I thinking of!

what is the most efficient approach?

is it > 8?

is it > 8? ×

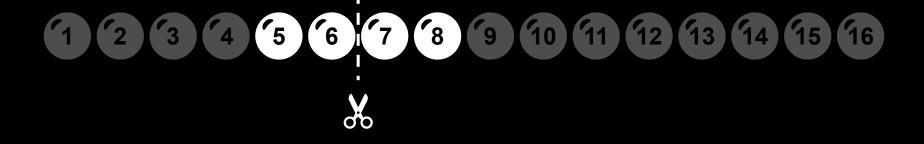

is it > 8? × is it > 4?

is it > 8? × is it > 4? ✓

is it > 8? × is it > 4? ✓ is it > 6? ✓

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

is it > 8?
$$\times$$
is it > 4? \checkmark
is it > 6? \checkmark
is it > 7?

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

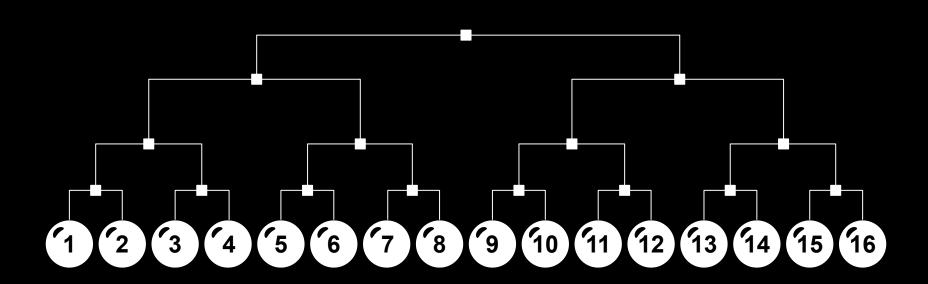

- is it > 8? × is it > 4? ✓ is it > 6? ✓ is it > 7? ×
- 1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

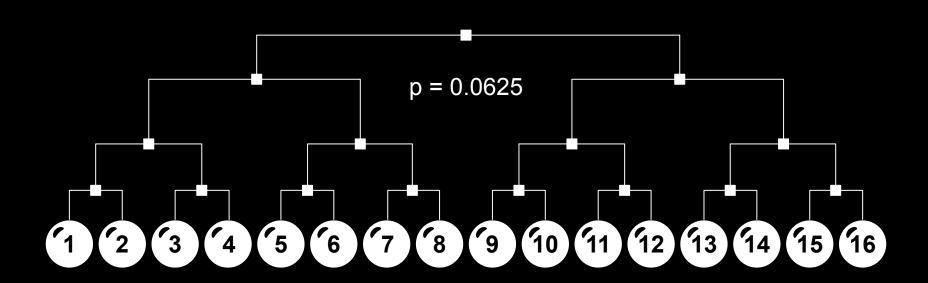

with 4 questions from 16 to 1

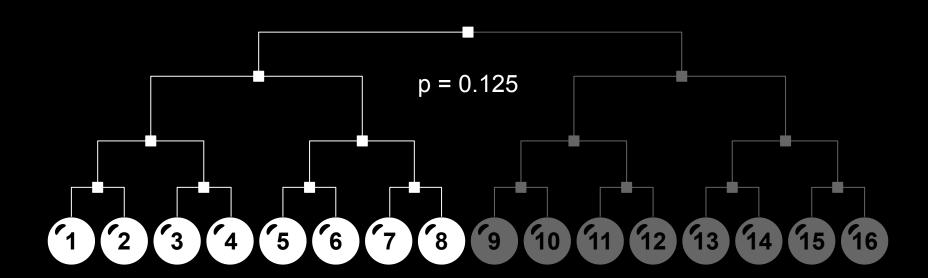

with 4 questions from 16 to 1

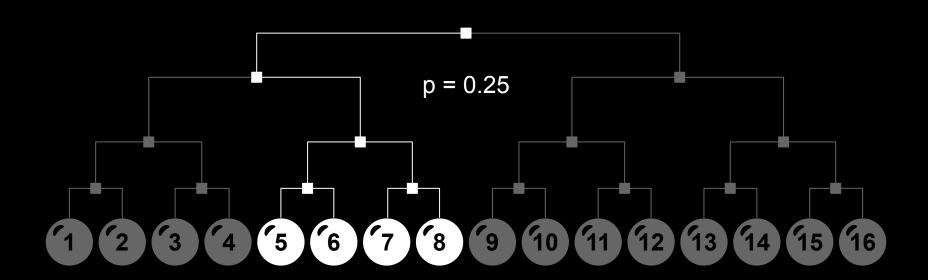

$$N = 16$$

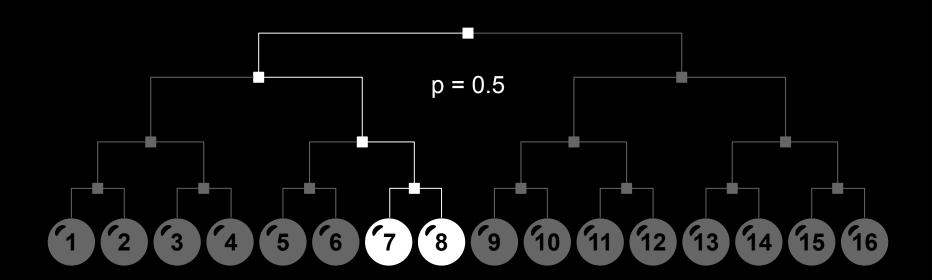

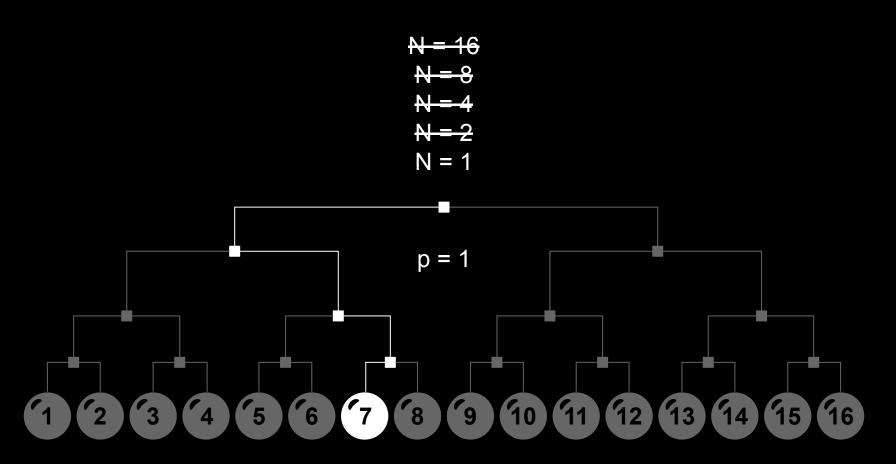

$$\frac{N = 16}{N = 8}$$

$$\frac{N = 16}{N = 8}$$
$$N = 4$$

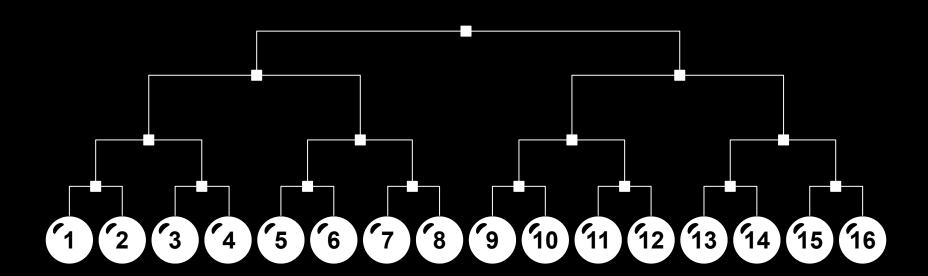

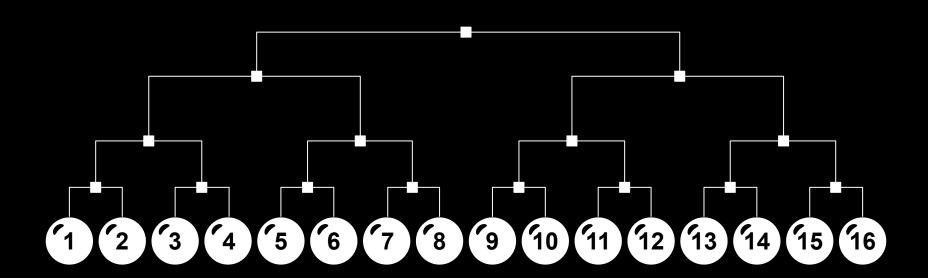

information = reduced uncertainty uncertainty is measured with the logarithm of N

$$H=log_2(N)$$

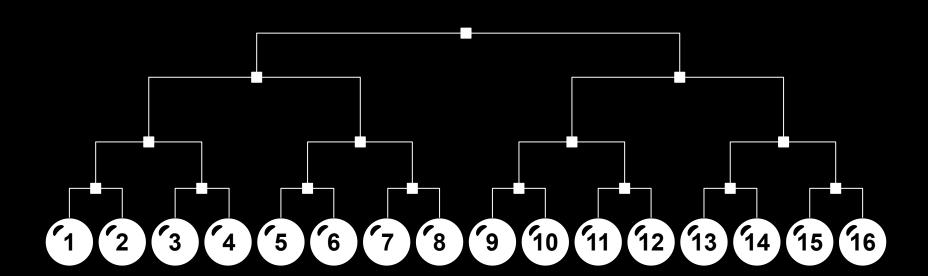

or: how often can we cut the remaining possibilities in half?

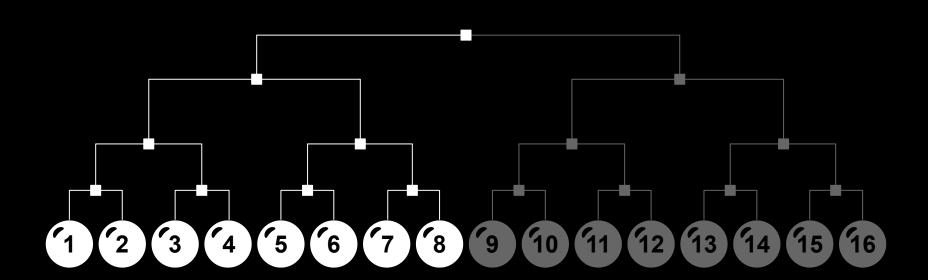

$$H=log_2(N)$$

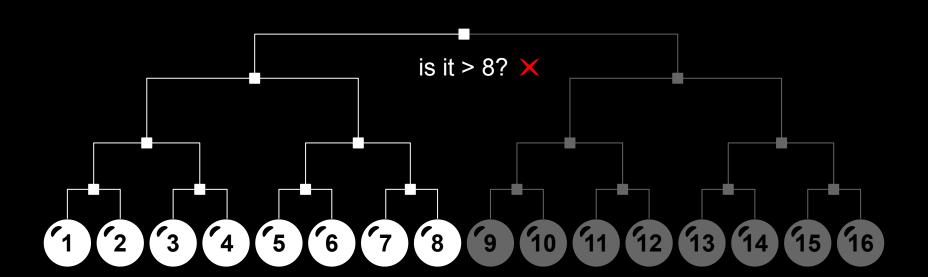

$$H_0 = log_2(16) = 4$$

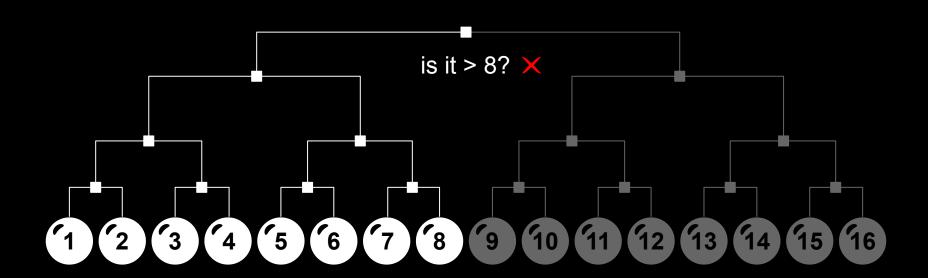

$$H_1 = log_2(8) = 3$$

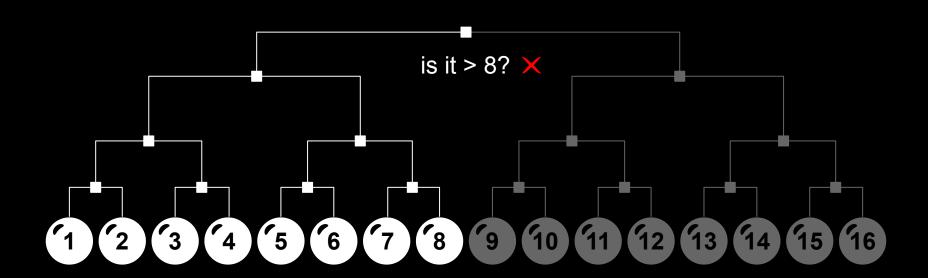

$$I=H_0-H_1$$

$$I=log_2(16)-log_2(8)$$

$$I=4-3=1$$

uncertainty and information are

measured in **bits**

how many yes/no questions to reduce uncertainty to zero?

 $H=0=log_2(1)$

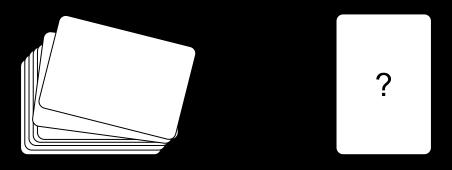

how many yes/no questions to reduce uncertainty to zero?

$$H=0=log_2(1)$$

 $H=log_2(N)$

poker

which card am I holding?

52 card poker deck

is it hearts?

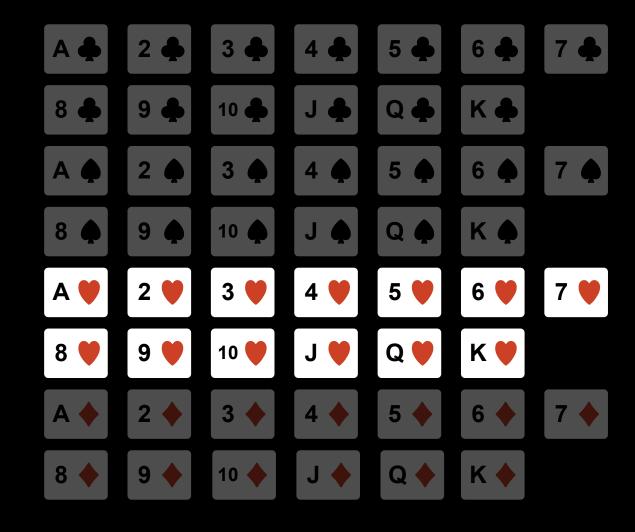

is it hearts?

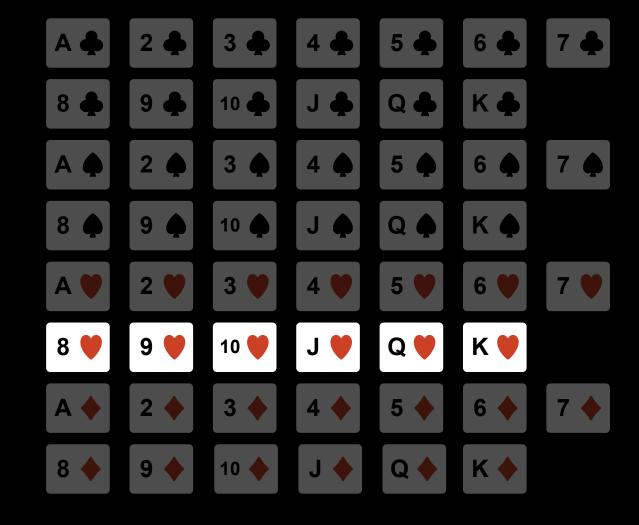

is it hearts?

is it 8 or above?

is it hearts?

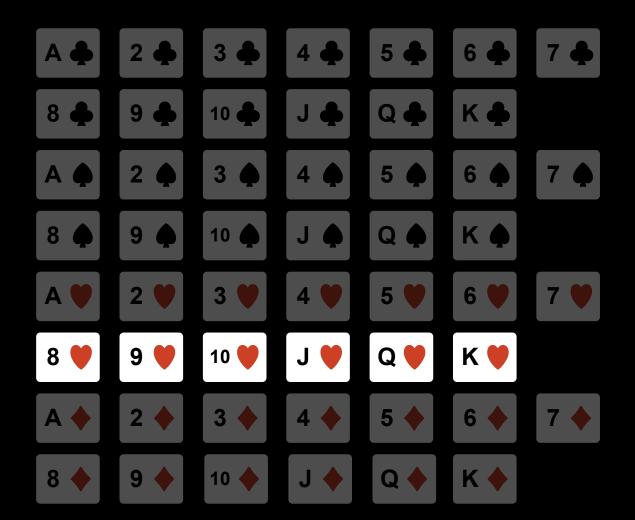

is it 8 or above?
yes

is it hearts?

is it 8 or above?
yes

is it jack or above?

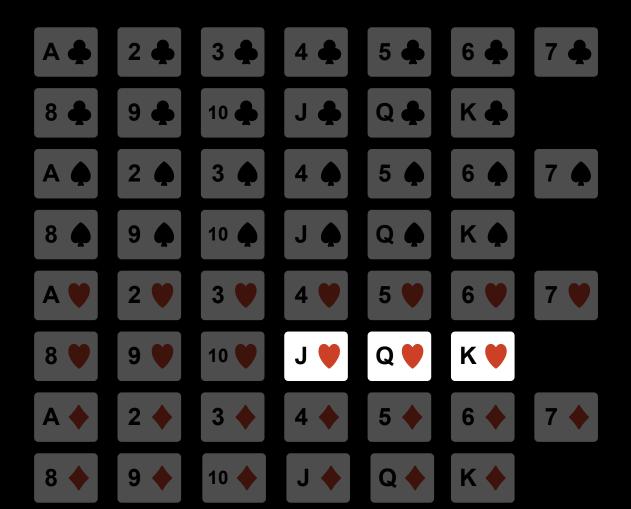

is it hearts?

is it 8 or above?
yes

is it jack or above?

yes

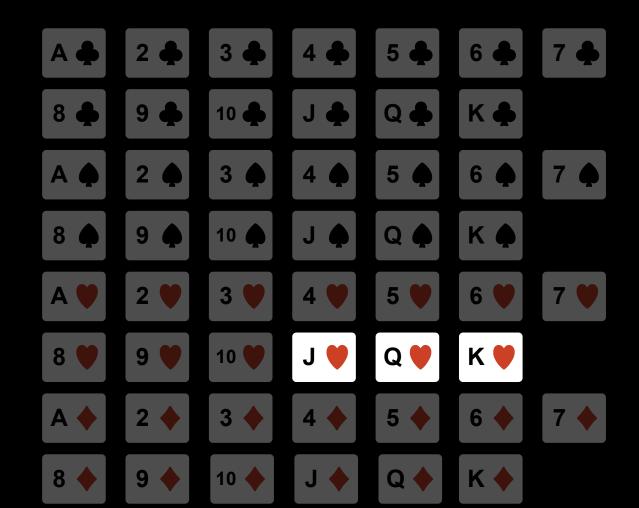

is it hearts?

is it 8 or above?

is it jack or above?

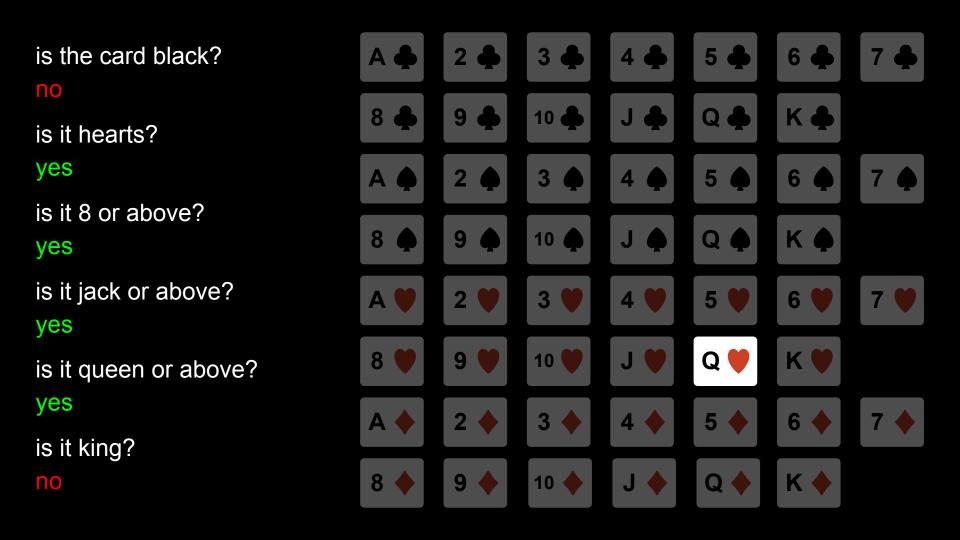

yes

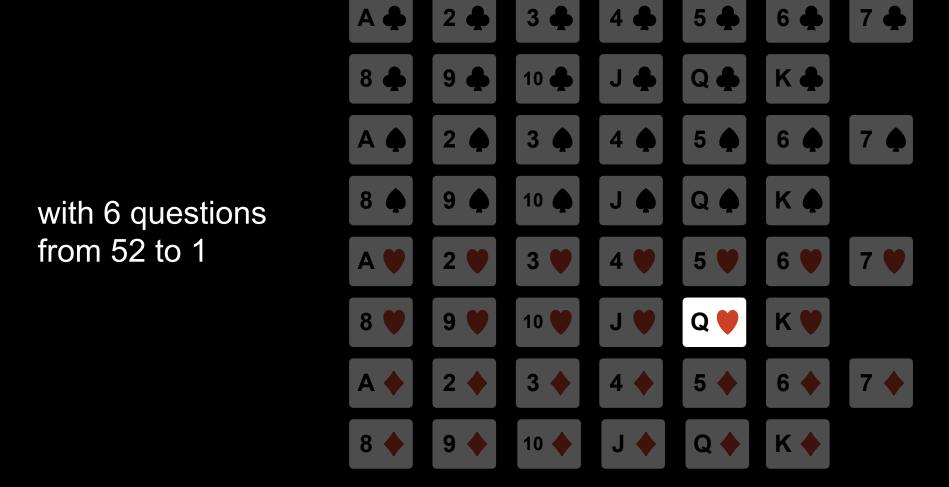

is it queen or above?

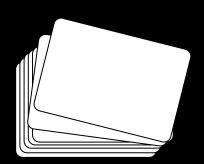

is the card black? no is it hearts? yes is it 8 or above? yes is it jack or above? yes Q 10 is it queen or above? yes 3 5

is the card black? no Q is it hearts? yes is it 8 or above? 10 yes is it jack or above? yes Q 10 is it queen or above? yes 3 5 is it king? Q

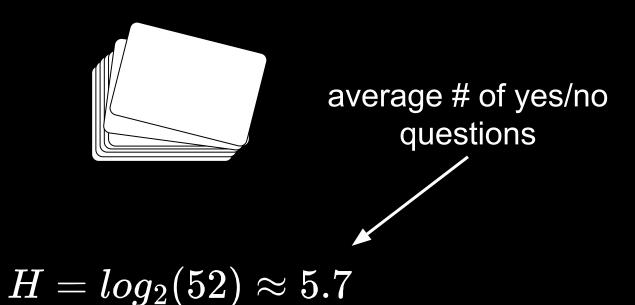

uncertainty with N = 52 possibilities?

$$H=log_2(52)pprox 5.7$$

uncertainty with N = 52 possibilities?

one bit of information with each answer...

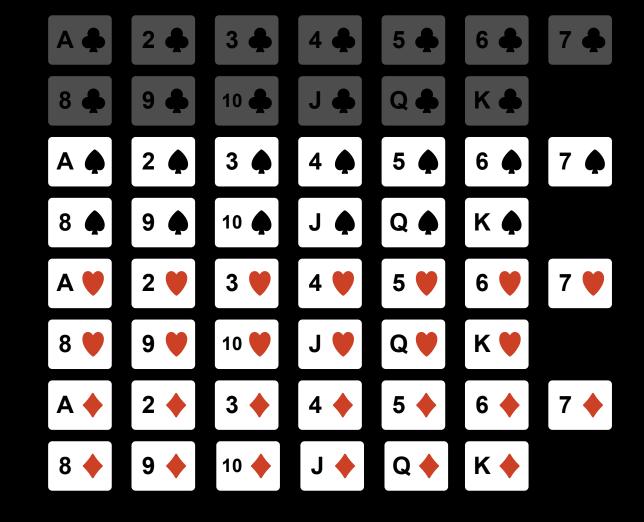

$$log_2(52) - log_2(26) = 1$$

one bit of information with each answer...

$$log_2(52) - log_2(26) = 1$$

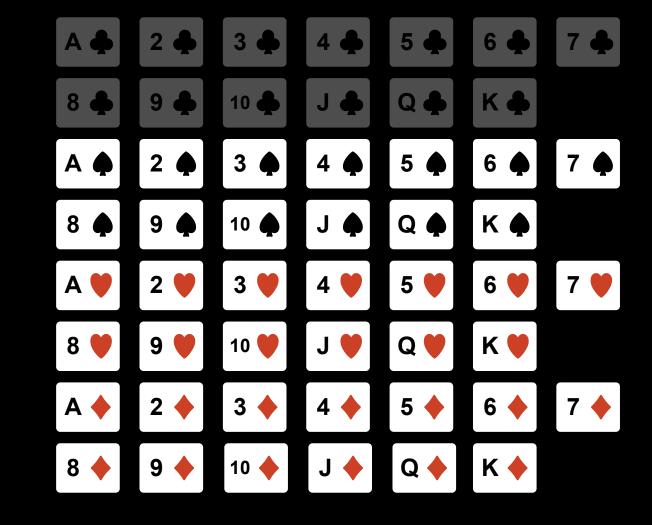

...that cuts the remaining options in half

is it a spades card? Q 6 is it a spades card?

is it a spades card?

how much information?

is it a spades card? no

how much information?

$$H_0 = log_2(52) pprox 5.7$$

$$H_1 = log_2(39) pprox 5.29$$

is it a spades card? no

how much information?

$$H_0 = log_2(52) pprox 5.7$$

 $H_1 = log_2(39) pprox 5.29$

 $\overline{H_0}-H_1pprox 0.41$

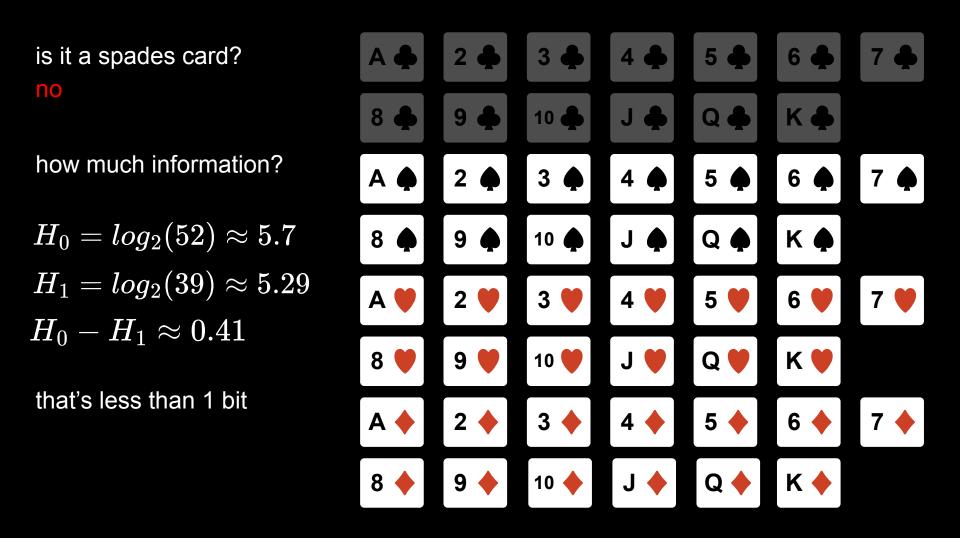

Q

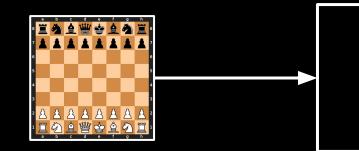

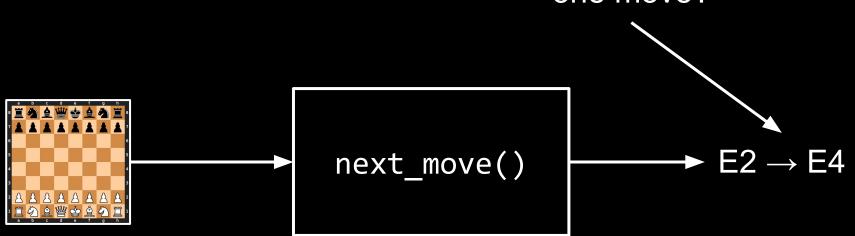

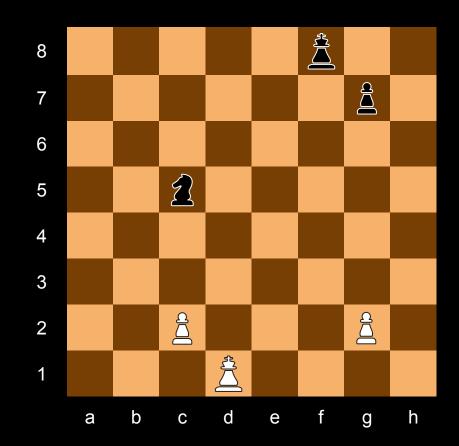

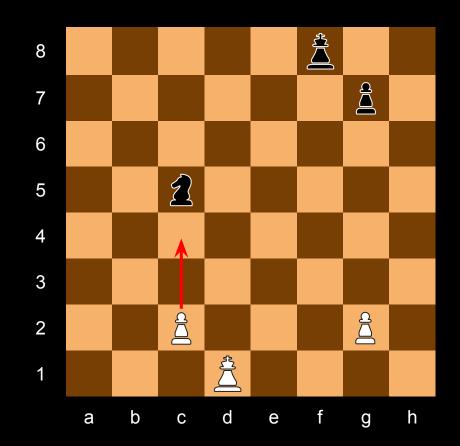

next_move()

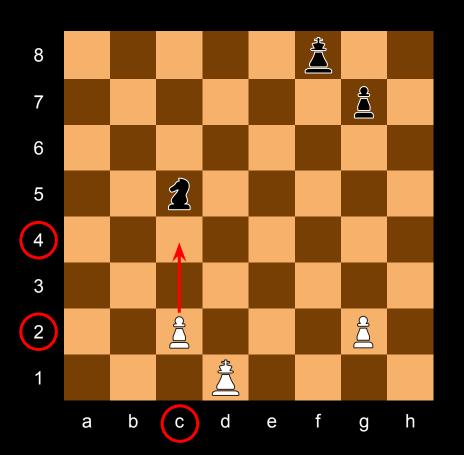

→ E2 → E4

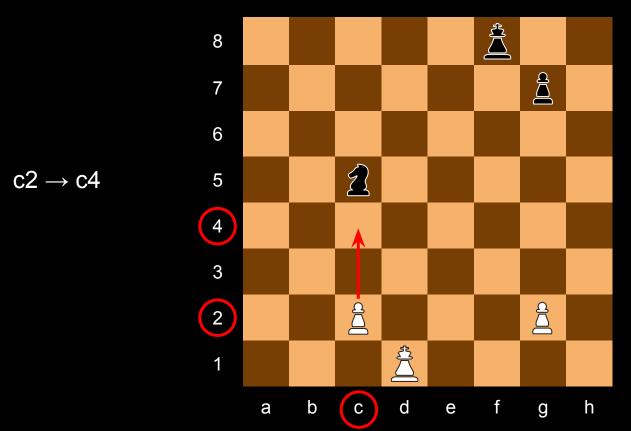

how much information is one move?

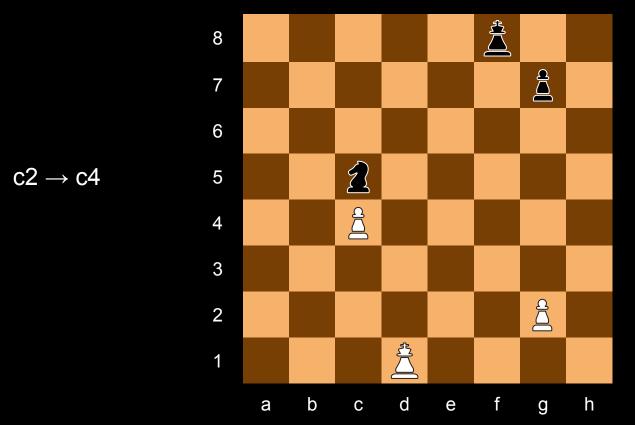

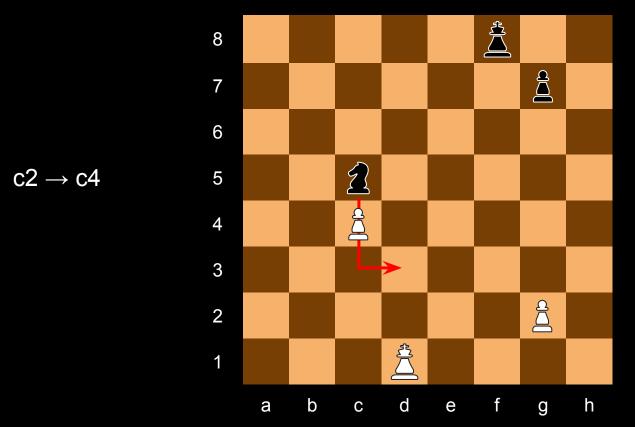

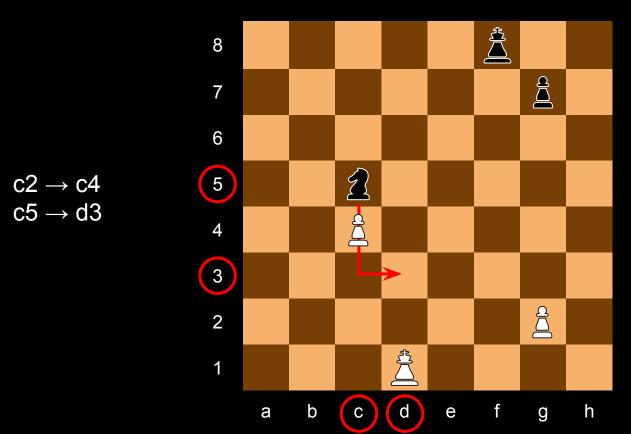

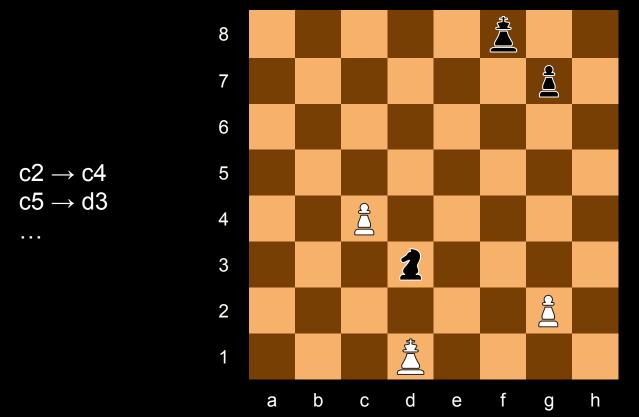

$c2 \rightarrow c4$

how many possibilities?

64 fields x 64 fields

how many possibilities?

$64 \times 64 = 4096$

possible moves*

$64 \times 64 = 4096$

$$H = log_2(4096) = 12$$

$64 \times 64 = 4096$

$$H = log_2(4096) = 12$$

one chess move is 12 bits of information

an alternative way to calculate # bits

<u>c</u> <u>2</u> <u>c</u> <u>4</u>

4 digits

<u>c</u> 2 <u>c</u> 4

4 digits 8 possible symbols per digit

c 2 c 4

4 digits
8 possible symbols per digit
how many bits per digit?

<u>c</u> 2 <u>c</u> 4

4 digits
8 possible symbols per digit
how many bits per digit?

$$H_{digit} = log_2(8) = 3$$

<u>c</u> 2 <u>c</u> 4

4 digits
8 possible symbols per digit
how many bits per digit?

$$H_{digit} = log_2(8) = 3$$
 $H_{move} = log_2(8) imes 4 = 12$

$H_{avg} = log_2(S) imes n$

S: number of possible symbols n: number of digits in our message

$H_{max} = \lceil log_2(S) \rceil imes n$

when calculating bits for storage, we must always consider the worst case
